

DEVELOP A PYTHON SCRIPT

Date	21-10-2022
Team ID	PNT2022TMID17569
Project Name	IOT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	Vetrivel K Yokeshwaran M Thirumoorthy M Vignesh J

SCRIPT:

```
a=int(input())  
b=int(input())  
c=a+b  
print ("The sum is", c)
```

The screenshot displays a Python script in an IDE. The code defines two variables, `a` and `b`, by taking user input, calculates their sum `c`, and prints the result. The output window shows the program running successfully, displaying "The sum is 12" and confirming the process finished with exit code 0.

```
1 a=int(input())  
2 b=int(input())  
3 c=a+b  
4 print ("The sum is", c)
```

Run: C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py

The sum is 12

Process finished with exit code 0
